

TECHNICAL MANAGER

- Australia's largest producer of pork & premium pork products
- Work in our industry leading Research & Innovation team
- Idyllic lifestyle in the Albury/Wodonga region

About Rivalea

We are one of Australia's leading integrated Agri-food companies, employing approximately 1150 people across the business in roles ranging from farming and meat processing, to sales and scientific research. With sites in regional and metropolitan locations, we provide premium pork products to local, national and export markets.

About the Role

This full-time position based in Corowa is responsible for large scale project management and science program implementation to achieve successful, industry leading research in animal health, nutrition, behaviour, reproduction, growth and physiology.

Key Responsibilities

- Initiate and design experiments that address current business challenges
- Collaborate with internal and external parties in the concept, design and execution of new research projects
- Liaise with production staff and external researchers to implement and complete research programs across multiple sites
- Manage a team of technical officers including rosters, daily work schedules, recruitment, performance reviews and performance management
- Provide leadership and training opportunities for technical officers to ensure their development and high standard research projects are delivered

Skills & Experience

- Post-graduate tertiary qualifications in Agriculture or Animal Science at Masters or higher level
- Demonstrated research skills
- Effective project management skills
- Ability to design and implement research protocols and interpret results
- Ability to present professional scientific or technical reports
- High level communication skills
- Advanced computer skills
- A current drivers licence.

Our recruitment process includes referee checks, a medical and a national police check.

Closing date for applications is 30th April. All applications should be lodged on Seek.com
